

APS FIREHOUSE ALERTING

PROVIDING ALL
OF YOUR
STATION
ALERTING
THROUGH ONE
CONTROLLER

Firehouse Alerting System Controller

The APS controller provides all of the functions to control your fire station alerting needs. Programmed ready to install out of the box, APS provides the programming needed for each individual station. We design your alerting system with multiple inputs and outputs that control all of your alerting needs to reduce response times.

Non-Proprietary Equipment

Compatible with industry standard products.

Easily Installed

The system can be preprogrammed for your station and be installed by using predefined terminal descriptions for the end user or electrical contractor.

Door Bell Annunciation

The front and rear door bells can be annunciated throughout the speaker system. An alert tone with the door location and description can be announced, including customer provided sound files.

Easy User Timing Changes

Timing can be changed through the password protected LCD for all timed functions including: volume control ramping, egress lightning, strobe timing, outside speakers and more.

Provides CAD Alerting Bypass

Manual bypass for prearranged CAD outages to revert to RF dispatching.

Audio Features

- Self ramping speakers
- Multiple audio inputs (Fire radio, Telephone, Mutual aid)
- Self-muting inputs during an alert
- Alerting by tone and/or voice (EMS, Fire, Squad, Truck)

Seamless Integration

- Integrates with our FAST alerting system
- Works with inputs from your two-tone decoder and other alerting devices.
- Works with emergency ring down phones

Modular Design

- Provides multiple inputs and outputs
- Multiple zones available (dorm, exterior, apparatus bay, etc.)
- Multiple resets available (system, stove, dorm specific)
- Controls egress lighting as well as our APS manufactured products
- Open bay doors and entry doors
- Control stove shutdown and reset (gas and electric stoves)
- Built-in exterior speaker timer

Easy Timer Functions

- Response timers
- Alerting time presets (day/evening)
- Exterior siren timing (day/night)
- Audio levels (day/evening)

Customized Alerting via Zoning

- Alert specific station and bunkroom zones for EMS, Truck, Squad, Chief and Engine.
- Select each zone you wish to be alerted for from your dorm room
- Multiple audio zones (exterior, dorms, apparatus bay, etc.)
- Colored indicator lights (EMS, Fire, Engine, Truck, Squad)

APS Firehouse Alerting has proven ourselves in the fire station alerting industry by designing systems that meet the needs of the department's new and remodeled stations. We provide the maintenance and service the fire service requires to maintain their systems. Our staff has years of fire service experience and understands the needs of your department.
